

收到错误域的secd cifsAuth问题 错误

https://kb-cn.netapp.com/on-prem/ontap/da/NAS/NAS-KBs/Receiving_secd_cifsAuth_problem_error_fo...

Updated: 周六, 12 7月 2025 14:00:44 GMT

适用场景

- ONTAP
- CIFS

问题描述

- 用户正在尝试访问具有错误域的共享。
- EMS日志中会报告以下事件：

```
Sat Nov 23 09:45:18 +0530 [NODE01: secd: secd.cifsAuth.problem:error]:  
vservers (SVM) General CIFS authentication problem. Error: User  
authentication procedure failed CIFS SMB2 Share mapping - Client Ip =
```

```
XX.XX.XX.XX [ 0 ms] Login attempt by domain user 'domain.com\NAME1' using
NTLMv2 style security [ 0] Using a cached connection to SVM.fgi.ad [ 13]
Encountered NT error (NT_STATUS_PENDING) for SMB command Read **[ 3019]
FAILURE: Pass-through authentication request failed. [ 3019] CIFS
authentication failed [ 3020] Using a cached connection to DC.newdomain.ad
[ 3023] Unable to find the NetBIOS domain name for Active Directory
'domain.com'
```

- SECD日志显示以下错误：

```
Wed Nov 20 2024 08:34:46 +05:30[kern_secd:info:10417] | [003.050.761] info
