

Nessus或其他安全扫描程序报告System Manager未强制实施HSTS

https://kb-cn.netapp.com/on-prem/ontap/dm/System_Manager/SM-KBs/Nessus_or_other_security_sca...

Updated: 周五, 11 7月 2025 14:44:43 GMT

适用场景

- ONTAP System Manager
- OnCommand System Manager

问题描述

- Nessus或其他安全扫描程序报告System Manager未强制实施HSTS。

The remote web server is not enforcing HSTS.

"The remote HTTPS server is not enforcing HTTP Strict Transport Security (HSTS) .

HSTS is an optional response header that can be configured on the server to instruct the browser to only communicate via HTTPS. The lack of HSTS allows downgrade attacks, SSL-stripping man-in-the-middle attacks, and weakens cookie-hijacking protections."

- Quer-s扫描程序报告QID 11827存在"HTTP Security Header Not Detected (未检测到HTTP安全标头)"漏洞
