Nessus或其他安全扫描程序报告System Manager未强制实施HSTS

适用场景

- ONTAP System Manager
- OnCommand System Manager

问题描述

- Nessus或其他安全扫描程序报告System Manager未强制实施HSTS。

```
The remote web server is not enforcing HSTS.
```

```
"The remote HTTPS server is not enforcing HTTP Strict Transport Security
(HSTS).
```

```
HSTS is an optional response header that can be configured on the server to
instruct
the browser to only communicate via HTTPS. The lack of HSTS allows downgrade
attacks,
SSL-stripping man-in-the-middle attacks, and weakens cookie-hijacking
protections."
```

- Quer-s扫描程序报告QID 11827存在"HTTP Security Header Not Detected (未检测到HTTP安全标头)"漏洞
