适用场景

FAS8300

问题描述

- 无法安装磁盘认证包 (DQP)

```
Cluster::> storage firmware download -node node_name -package-url  
http://xxx.xx.xx.x.xxx/qual_devices.zip  
Firmware download started.
```

```
Failed to download package from qual_devices.zip. Reason: Failed writing  
received data to disk/application : Failure writing output to destination.
```

Error: command failed: Download failed. Reason: Failed to download package from all.zip.

Reason: Failed writing received data to disk/application: Failure writing output to destination.

- `/mroot/download` 被列为文件而不是目录

```
Cluster% ls -la /mroot/download
```

```
-rw-r--r--  1 root  wheel  0 Sep 15  2021 /mroot/download
```
