

ONTAP升级后持续发出 vifmgr.cluscheck.ctdptkloss 警报

https://kb-cn.netapp.com/on-prem/ontap/OHW/OHW-KBs/Continuous_vifmgr.cluscheck.ctdptkloss_aler...

Updated: 周五, 11 7月 2025 14:59:59 GMT

适用场景

- ONTAP 9
- FAS9000
- AFF A700
- 无交换机集群
- X91440A网络适配器

问题描述

- 从 9.13.1P13 升级到 9.15.1P11 后，集群报告连续的“vifmgr.cluscheck.ctdptkloss:从集群 LIF 执行 ping 操作时继续丢失数据包”警报。

```
cluster1::event log> show -event *vifmgr.cluscheck.ctdpktloss*
Time          Node          Severity    Event
-----
6/18/2025 09:51:03 cluster1-01    ALERT      vifmgr.cluscheck.ctdpktloss:
Continued packet loss when pinging from cluster lif cluster1-01_clus8
(node cluster1-01) to cluster lif cluster1-02_clus8 (node cluster1-02).
6/18/2025 09:50:41 cluster1-01    ALERT      vifmgr.cluscheck.ctdpktloss:
Continued packet loss when pinging from cluster lif cluster1-01_clus8
(node cluster1-01) to cluster lif cluster1-02_clus7 (node cluster1-02).
6/18/2025 09:50:19 cluster1-01    ALERT      vifmgr.cluscheck.ctdpktloss:
Continued packet loss when pinging from cluster lif cluster1-01_clus8
(node cluster1-01) to cluster lif cluster1-02_clus6 (node cluster1-02).
6/18/2025 09:49:57 cluster1-01    ALERT      vifmgr.cluscheck.ctdpktloss:
Continued packet loss when pinging from cluster lif cluster1-01_clus8
(node cluster1-01) to cluster lif cluster1-02_clus5 (node cluster1-02).
6/18/2025 09:49:24 cluster1-01    ALERT      vifmgr.cluscheck.ctdpktloss:
Continued packet loss when pinging from cluster lif cluster1-01_clus8
(node cluster1-01) to cluster lif cluster1-02_clus4 (node cluster1-02).
6/18/2025 09:43:39 cluster1-02    ALERT      vifmgr.cluscheck.ctdpktloss:
Continued packet loss when pinging from
cluster lif cluster1-02_clus8 (node cluster1-02) to cluster lif
cluster1-01_clus8 (node cluster1-01).
6/18/2025 09:42:54 cluster1-02    ALERT      vifmgr.cluscheck.ctdpktloss:
Continued packet loss when pinging from cluster lif cluster1-02_clus7
(node cluster1-02) to cluster lif cluster1-01_clus7 (node cluster1-01).
6/18/2025 09:42:10 cluster1-02    ALERT      vifmgr.cluscheck.ctdpktloss:
Continued packet loss when pinging from cluster lif cluster1-02_clus6
(node cluster1-02) to cluster lif cluster1-01_clus6 (node cluster1-01).
6/18/2025 09:41:25 cluster1-02    ALERT      vifmgr.cluscheck.ctdpktloss:
Continued packet loss when pinging from cluster lif cluster1-02_clus5
(node cluster1-02) to cluster lif cluster1-01_clus5 (node cluster1-01).
6/18/2025 09:40:39 cluster1-02    ALERT      vifmgr.cluscheck.ctdpktloss:
Continued packet loss when pinging from cluster lif cluster1-02_clus4
(node cluster1-02) to cluster lif cluster1-01_clus4 (node cluster1-01).
```

- 集群端口已启动，集群 LIF 位于其主端口。
- 集群端口上未观察到任何错误或丢弃。
- 此集群最近从使用 NetApp CN1610 交换机的集群转换为无交换机集群。
- 此处使用的集群端口为 e4a、e4b、e4c、e4d、e8a、e8b、e8c、e8d，并且它们配置为分支模式。
