## AWS CVO HA MAz 部署在连接探测测试期间失败

[https://kb-cn.netapp.com/Cloud/ncds/Cloud\\_Manager/AWS\\_CVO\\_HA\\_MAz\\_deployment\\_fails\\_during\\_...](https://kb-cn.netapp.com/Cloud/ncds/Cloud_Manager/AWS_CVO_HA_MAz_deployment_fails_during_...)

Updated: Sun, 05 Oct 2025 11:23:46 GMT

### 适用于

- BlueXP
- Cloud Volumes ONTAP (CVO)
- Amazon Web Services (AWS)
- 在 MAZ 上部署 CVO HA

### 问题描述

使用 BlueXP 在 AWS 中部署 CVO HA（多 AZ）系统在连接探测阶段失败。此错误在 BlueXP 时间轴和日志中可见，如下所示：

```
Error: No connectivity to ports 443, 3000 which is required for proper
```

```
functioning
{
  "_failure": "Connection attempt to 10.81.65.6:443 failed",

  "isMandatory": true,
  "portRole": "HTTPS",
  "probeInfo": {
    "ip": "10.81.65.6",
    "port": 443,
    "probeType": "Node1",
    "subnetCidr": "10.81.65.0/27"
  }
}
```

即使网络和安全组设置正确，对两个节点和调解器的其他所需端口（例如 3000、2049 等）也会出现类似故障。
