- ONTAP 9

问题描述

当尝试使用 NetApp ONTAP REST API 驱动程序在 OpenStack Manila 中创建新共享时，操作失败。在 Manila 共享日志中观察到以下错误：

```
Creation of share instance <UUID> failed: failed to get share server:
manila.share.drivers.netapp.dataontap.client.api.NaApiError: NetApp API failed.
Reason -262196: Field "retention_period" cannot be set in this operation
```
