

由于版本不匹配，集群加入失败

https://kb-cn.netapp.com/on-prem/ontap/Ontap_OS/OS-KBs/Cluster_join_fails_due_to_version_mismatch

Updated: Fri, 17 Apr 2026 13:36:07 GMT

适用于

- ONTAP 9
- 集群加入

问题

- 尝试将新节点加入现有群集时，操作失败，出现以下错误之一：

```
Error: command failed: The currently running image on this node lacks the following capabilities which are installed on other nodes in the cluster: sm_cg_restart_enabled
```

```
This node must be upgraded to 9.16.1P10 or a later release or the cluster must be downgraded to the release version of this node.
```

- 示例场景：
 - 新节点正在运行较低的补丁版本（例如，9.16.1P3），而集群位于相同主要版本的更高补丁上（例如，9.16.1P10）
