## 更换主板后，交还被 FabricPool 否决

[https://kb-cn.netapp.com/on-prem/ontap/OHW/OHW-KBs/After\\_motherboard\\_replacement%2C\\_giveba...](https://kb-cn.netapp.com/on-prem/ontap/OHW/OHW-KBs/After_motherboard_replacement%2C_giveba...)

Updated: Wed, 22 Apr 2026 01:07:33 GMT

### 适用于

- ONTAP 9
- AFF-A400/AFF-C400
- FAS8300
- FAS8700
- FAS2820
- FabricPool
- ONTAP S3

## 问题

- 在控制器上更换主板后，由于无法访问 FabricPool，回滚操作被否决：

```
[object.store.unavailable:EMERGENCY]: Unable to connect to the object store
"FP-s3-local" from node 58a84a4c-bdda-11ed-ac84-xxxxxxxxxxxx. Reason: Inter-
cluster LIF not configured.
[cf_giveback: sfo.sendhome.subsystemAbort:alert]: The giveback operation of
'node01' was aborted by 'fabric pools'.
```

- 此外，受影响节点的网络接口状态显示集群间 LIF 已关闭：

```
Cluster1::> network interface show -role intercluster
Vserver      Interface      Admin/Oper  Address/Mask  Node      Port      Is
