## 枚举快照时出现 Nblade.CifsOperationTimedOut 错误

[https://kb-cn.netapp.com/on-prem/ontap/da/NAS/NAS-KBs/Nblade.CifsOperationTimedOut\\_error\\_when...](https://kb-cn.netapp.com/on-prem/ontap/da/NAS/NAS-KBs/Nblade.CifsOperationTimedOut_error_when...)

Updated: Sat, 25 Apr 2026 10:18:28 GMT

### 适用于

- ONTAP 9
- SMB
- 卷快照

## 问题

- EMS 中报告的间歇性 CIFS 操作超时错误

```
Nblade_CifsOperationTimedOut_1:error]: params: {'commandName': 'SMB2_COM_IOCTL', 'cmdRestartCnt': '0', 'lastCsmError': 'CSM_OK', 'remoteBladeID': 'xxxx(node04)', 'isQosEnabled': 'QoS_disabled', 'lastSpinNpError': '410 (Spinnp op has timed out in WAFL)', 'clientIpAddress': 'xxx.xxx.xxx.xxx', 'localIpAddress': 'xxx.xxx.xxx.xxx', 'vserverId': '2', 'dsId': '1234', 'vserverName': 'svml'}
```

- 从覆盖超时事件的数据包跟踪中找到 IOCTL 调用

```
SMB2 Create Request File: folder1\folder2;Ioctl Request  
FSCTL_SRV_ENUMERATE_SNAPSHOTS
```
