## 提升 tridentSnapMirror 导致 Vserver 暂时锁定更改

[https://kb-cn.netapp.com/Cloud/Astra/Trident/Promoting\\_a\\_tridentSnapMirror\\_caused\\_Vserver\\_tempor...](https://kb-cn.netapp.com/Cloud/Astra/Trident/Promoting_a_tridentSnapMirror_caused_Vserver_tempor...)

Updated: Tue, 02 Jun 2026 08:12:26 GMT

### 适用于

- 适用于 Kubernetes 和 Openshift 的 Trident
- ONTAP 9.16.1P11
- MCC, SVM-DR

### 问题

从 trident-controller 的 Trident 事件中看到的完整错误是：

```
time="2026-05-26T07:47:11Z" level=error msg="Could not promote mirror"
```

```
TridentMirrorRelationship=<TMR_NAME> crdControllerEvent=update error="API  
State: failure, Message: This Vserver is temporarily locked from changes while  
recording the configuration baseline. Try again in a few minutes or manually  
stop configuration replication by running \"vserver config-replication pause\"  
and retry the command., Code: 2621573"  
logLayer=crd_frontend logSource=trident-crd-controller requestID=<REQUEST_UID>  
requestSource=CRD workflow="cr=reconcile"
```
