适用于

NetApp StorageGRID

问题

一些/所有先前已删除的对象被列为现有：

- 对象已删除：

```
aws --endpoint-url https://URL:443 s3 rm s3://objectpath/object.txt
```

- 列表：

```
aws --endpoint-url https://URL:443 s3 ls s3://objectpath/object.txt
2020-06-10 23:01:24 53027418 object.txt
```

- 在对象上尝试的操作（复制）：

```
aws --endpoint-url https://URL:443 s3 cp s3://objectpath/object.txt /tmp
fatal error: An error occurred (404) when calling the HeadObject
operation: Key "s3://objectpath/object.txt" does not exist
```
