mindtouch™

在System Manager自动升级期间、节点无法启动

Updated: 周三, 09 7月 2025 14:25:47 GMT

适用场景

- ONTAP 9
- 从ONTAP 9.10.1P3升级到ONTAP 9.11.1
- 使用System Manager自动进行无中断更新

问题描述

- System Manager自动升级ONTAP 的过程不会进行、并且节点无法启动。
- EMS日志

```
ERROR upgrademgr.update.pausedErr: The automated update of the cluster has
been paused due to the following reason:  Node "node1": Error: {Node
```

```
"node2" is not in "waiting for giveback" state.}, Action: {Use the
"storage failover show" to verify that node "node2" is in one of the
following states: "waiting for giveback" or "connected".}.
```

- System Manager未显示恢复按钮。
- 节点2已在手动重新启动后完成升级。
- 节点1已完成升级任务、但尚未将其修改为升级版本的新启动映像。

```
::> cluster image show
Node                Current Version        Installation Date
------------------- ---------------------- -------------------
node1               9.10.1P3               XX/XX/20XX XX:XX:XX
node2               9.11.1                 XX/XX/20XX XX:XX:XX
2 entries were displayed.
```

- 集群没有任何硬件错误。
