

ONTAP 升级后、MetroCluster check show 指示警告

https://kb-cn.netapp.com/on-prem/ontap/MC/MC-KBs/After_ONTAP_upgrade_metrocluster_check_sho...

Updated: 周二, 27 5月 2025 19:41:07 GMT

适用场景

- ONTAP 9
- MetroCluster

问题描述

- ONTAP 升级后、`metrocluster check cluster show` 会报告以下信息：

```
Cluster01::> metrocluster check cluster show
```

```
Last Checked On: 12/3/2022 18:50:54
```

Cluster	Check	Result
Cluster01		
negotiated-switchover-ready		ok
switchback-ready		not-applicable
job-schedules		warning
licenses		ok
periodic-check-enabled		ok
onboard-key-management		ok
external-key-management		ok
Cluster02		
negotiated-switchover-ready		ok
switchback-ready		not-applicable
job-schedules		warning
licenses		ok
periodic-check-enabled		ok
onboard-key-management		ok
external-key-management		ok
14 entries were displayed.		

- `metrocluster check cluster show -instance` 的输出用于指示哪些计划存在问题：

```
Cluster01::> metrocluster check cluster show -instance
Type of Check: job-schedules
Cluster Name: Cluster01
Result of the Check: warning
Additional Information/Recovery Steps: Schedule(s) missing on remote
cluster:
Schedule(s) with different descriptions: hourly
Run "job schedule show" on both clusters to view the schedules.

Type of Check: job-schedules
Cluster Name: Cluster02
Result of the Check: warning
Additional Information/Recovery Steps: Schedule(s) missing on remote
cluster:
Schedule(s) with different descriptions: hourly
Run "job schedule show" on both clusters to view the schedules.
```

- `job schedule show` 输出确认作业不相同：

```
Cluster01::> job schedule show hourly
Cluster    Name      Type      Description
-----
-----
```

```
Cluster01    hourly    cron    @:05

Cluster02::> job schedule show hourly
Cluster      Name      Type      Description
-----
Cluster02    hourly    cron    @:40
```
