

## Brocade交换机中标记为慢漏设备的端口

[https://kb-cn.netapp.com/on-prem/Switches/Brocade-KBs/Port\\_marked\\_as\\_Slow\\_Drain\\_Device\\_in\\_Bro...](https://kb-cn.netapp.com/on-prem/Switches/Brocade-KBs/Port_marked_as_Slow_Drain_Device_in_Bro...)

Updated: 周五, 11 7月 2025 07:52:46 GMT

### 适用场景

- Brocade Fabric OS 7.4及更高版本

### 问题描述

- 一个或多个端口在Brocade交换机中标记为"低漏电设备"、并通过运行进行验证 `sddquarantine --show`

示例：

```
----- SDDQ Data -----
```

```
-----  
Ports marked as Slow Drain Quarantined in the Local Switch:
```

2/8

```
-----  
Online Quarantined Devices across the fabric  
-----  
Port Index | PID | PWWN  
-----  
174 | 01ae01 | 00:00:00:00:00:00:00:00  
-----  
Configured Limit=10 Quarantined count in chassis=1
```

- 还可以从 `errrdump -a` 输出中验证时间点：

示例：

```
2020/06/04-09:25:22, [MAPS-1022], 74058, SLOT 7 | FID 128, WARNING,  
SANCORESWITCH, Port 2/8 (Port index 24) has been marked as Slow Drain  
Device.
```

- 在映射清除状态之前、端口状态将保持隔离状态

```
2020/06/04-09:26:22, [MAPS-1003], 74059, SLOT 7 | FID 128, WARNING,  
SANCORESC10, CASTNASCLP01-03_0e, F-Port 2/8,  
Condition=ALL_PORTS(DEV_LATENCY_IMPACT==IO_LATENCY_CLEAR), Current  
Value:[DEV_LATENCY_IMPACT, IO_LATENCY_CLEAR],  
RuleName=ALL_PORTS_IO_LATENCY_CLEAR, Dashboard Category=Fabric Performance  
Impact.
```

```
2020/06/04-09:36:22, [NS-1018], 74060, SLOT 7 | FID 128, INFO,  
SANCORESWITCH, Domain 10, Port index 24, All devices zoned with the slow  
drain device 0x0a1800 have been unquarantined.
```

```
2020/06/04-09:36:22, [MAPS-1025], 74062, SLOT 7 | FID 128, WARNING,  
SANCORESWITCH, Port 2/8 (Port index 24) removed from the Slow Drain Device  
Quarantine Group.
```
