

应用 Object: igroup Method: baseline 失败。原因：无法创建启动器组 X，因为启动器是启动器组 Y 的成员，存在 ostype 冲突

https://kb-cn.netapp.com/on-prem/ontap/MC/MC-KBs/Apply_failed_for_Object__igroup_Method__basel...

Updated: Fri, 17 Apr 2026 10:59:22 GMT

适用于

- MetroCluster
- ONTAP 9

问题描述

由于来自属于 Vserver 的 igroup 中的启动器的 ostype 冲突，MetroCluster 中的 Vserver 的配置状态被标记为已降级。

```
Cluster : clusterA
  Vserver : vserver1
    Partner Vserver : vserver1-mc
Configuration State : degraded
  Stream Status : operation-failed
  Corrective Action : Resynchronize the configuration using "metrocluster
vserver resync" command. Contact technical support for assistance if
configuration-state does not change to healthy.
...
  Failed Reason : Apply failed for Object: igroup Method: baseline. Reason:
Cannot create initiator group "igroup_windows" because the initiator
"initiator1" is a member of the initiator group "igroup_vmware" with
conflicting ostype "vmware".
```
