

## 升级到9.12.1P4后、LS镜像触发了vol.DUPL.MSID事件

[https://kb-cn.netapp.com/on-prem/ontap/Ontap\\_OS/OS-KBs/vol.duplicate.msids\\_event\\_triggered\\_for\\_L...](https://kb-cn.netapp.com/on-prem/ontap/Ontap_OS/OS-KBs/vol.duplicate.msids_event_triggered_for_L...)

Updated: 周六, 12 7月 2025 14:05:22 GMT

### 适用场景

- ONTAP
  - 9.13.0P3.
  - 9.12.1P4.
- 负载共享镜像(LS)

### 问题描述

- 升级后，EMS开始发送紧急警报，LS镜像中存在重复的MSID。

```
Wed Jun 21 23:53:45 -0500 [node-01: mgwd: vol.duplicate.msids:EMERGENCY]:  
Duplicate MSID "2157483507" has been detected in SVM "svm1". The duplicate
```

MSID is used for volumes "svm1\_root\_ls01" and "svm1\_root".  
Wed Jun 21 23:53:45 -0500 [node-01: mgwd: vol.duplicate.msid:EMERGENCY]:  
Duplicate MSID "2157483507" has been detected in SVM "svm1". The duplicate  
MSID is used for volumes "svm1\_root\_ls02" and "svm1\_root".  
Wed Jun 21 23:53:45 -0500 [node-01: mgwd: vol.duplicate.msid:EMERGENCY]:  
Duplicate MSID "2157483510" has been detected in SVM "svm2". The duplicate  
MSID is used for volumes "svm2\_root\_ls01" and "svm2\_root".  
Wed Jun 21 23:53:45 -0500 [node-01: mgwd: vol.duplicate.msid:EMERGENCY]:  
Duplicate MSID "2157483510" has been detected in SVM "svm2". The duplicate  
MSID is used for volumes "svm2\_root\_ls02" and "svm2\_root"

- 这些卷可以同时作为LS镜像、而不是FlexGroup成员。

```
::> volume show -msid <msid_number>
::> snapmirror show -vserver <svm_name> -type LS
::> vol show -vserver <svm_name> -volume <volume_name> -fields is-
constituent,is-flexgroup
```
