

## 如果无法连接到所需端点，则创建连接器失败

[https://kb-cn.netapp.com/Cloud/ncds/Cloud\\_Manager/Creating\\_connector\\_fails\\_if\\_it\\_cannot\\_connect\\_t...](https://kb-cn.netapp.com/Cloud/ncds/Cloud_Manager/Creating_connector_fails_if_it_cannot_connect_t...)

Updated: Sun, 12 Oct 2025 01:17:05 GMT

### 适用于

- NetApp BlueXP
- Amazon Web Service (AWS)
- Google Cloud Platform (GCP)
- 网络设置不允许连接器连接到在 BlueXP 中从 AWS 中 [创建连接器所需的端点](#)

### 问题

- 创建连接器失败，出现错误：

```
{"message":"Instance is ready","priority":"success"}  
{"message":"Waiting for agent to be active...","priority":"info"}
```

```
{ "message": "Polling connector status...", "priority": "info" }
{ "message": "Polling connector status...", "priority": "info" }
{ "message": "Polling connector status...", "priority": "info" }
{ "message": "Polling connector status...", "priority": "info" }
{ "message": "Polling connector status...", "priority": "info" }
{ "message": "Polling connector status...", "priority": "info" }
{ "message": "Polling connector status...", "priority": "info" }
{ "message": "Polling connector status...", "priority": "info" }
{ "message": "Polling connector status...", "priority": "info" }
{ "message": "Polling connector status...", "priority": "info" }
{ "message": "Failed to deploy connector.", "priority": "error" }
{ "message": "Connector is not ready. Attempts
exhausted.", "priority": "error" }
{ "message": "Error: Connector is not ready. Attempts exhausted.\n    at
n.project
```

- 在 BlueXP 中，连接器状态为 **Pending**
- 在 AWS Management Console 中，连接器已成功部署为 EC2 实例
