### 适用场景

ONTAP API

### 问题描述

由于 客户端匹配的IP地址已被调用、以下命令将失败、如下所示。

```
::> vservers export-policy rule remove-clientmatches -vservers Test009  
-policyname luxin -ruleindex 10000 -clientmatches 1.1.1.1
```

```
Warning: Not removing any strings from the clientmatch field for ruleindex  
10000 in export policy "luxin", vservers "Test009". None of the match strings  
were found in the clientmatch list.
```

但是、按如下所示使用REST API将获得 200个OK状态代码。
