

Active IQ Unified Manager 警报：已违反节点磁盘碎片化警告阈值

https://kb-cn.netapp.com/Legacy/OnCommand_Suite/Active_IQ_Unified_Manager_Alert__Node_Disk_...

Updated: Fri, 24 Apr 2026 23:06:42 GMT

适用场景

- OnCommand统一管理器(OCUM)
- Active IQ Unified Manager (AIQUM)
- ONTAP 9
- SnapMirror

注：

- 从9.6RC1 (及更高版本)开始、OnCommand Unified Manager已更名为Active IQ Unified Manager
- 在本文档中、Unified Manager将称为ActiveIQ Unified Manager (AIQUM)

问题描述

- Active IQ Unified Manager 在集群中的卷中报告node disk fragmentation 警告警报
- 但是、执行 [重新分配度量](#) 会显示极低的碎片(级别1或2)。

示例：

```
From: "Active IQ Unified Manager"<aiqum@company.com>
Date: Jul 4, 2017 6:01 AM
Subject: Performance Alert - 1 new warning system-defined threshold(s)
breached on Cluster cluster1
To: "Storage Admins"<storageadmins@company.com>
```

Warning System-defined Threshold Event

Summary

Trigger Time: 5:39 am, 4 Jul EDT

Description: 1 new warning system-defined threshold(s) breached on
Cluster cluster1

p-sdt-cluster1-nod-1212

Policy Name: Node disk fragmentation

A WARNING event has been triggered on nodel based on the detection
of high node utilization caused by high
percentage of delayed disk write on nodel_aggr_sas1.
