KTLS 失败和对象存储不可用消息

适用于

- Amazon FSx for NetApp ONTAP
- ONTAP S3
- ONTAP 9.13.1及更高版本

问题描述

- 无法在 S3 存储桶中上传文件
- 读取和写入图像都会抛出错误"HTTP/1.1 501 Not Implemented"
- 您在 EMS 中经常看到以下消息：

```
 Fri Jan 05 00:23:45 +0000 [FsxId0000000-02: kernel: ems.engine.
suppressed:debug]: Event 'ktls.cnxnHandshakeLimit' suppressed 10939 times
in last 61 seconds. Fri Jan 05 00:23:45 +0000 [FsxId0000000-02: kernel:
ktls.cnxnHandshakeLimit:notice]: ONTAP reached the maximum limit of 170
concurrent TLS connection handshakes. If this limit is reached,
subsequent TLS connections will fail.
```

- 这些可包括以下内容：

```
 Fri Jan 05 00:25:25 +0000 [FsxId0000000-02: OscLowPriThreadPool: object.
store.unavailable:EMERGENCY]: Unable to connect to the object store
"FSxFabricpoolObjectStore" from node 1234-1234-1234-1234-1234. Reason:
Connection unavailable. Fri Jan 05 00:25:26 +0000 [FsxId0000000-02:
OscLowPriThreadPool: object.store.available:notice]: Able to connect to
the object store "FSxFabricpoolObjectStore" from node 1234-1234-1234-1234-
1234.
```
