

尝试增加卷最大自动大小功能时的注意事项

https://kb-cn.netapp.com/on-prem/ontap/dp/SnapMirror/SnapMirror-KBs/Considerations_when_attempting_to_increase_the_maximum_autosize_of_a_volume

Updated: 周五, 11 7月 2025 15:03:51 GMT

适用场景

- ONTAP 9
- SnapMirror
- 扇出
- 级联

问题描述

- 即使源卷和目标卷的版本相同、现有卷的大小也不能增加到100 TB以上
 - `netapp1-dst::> volume modify -vserver dst_SVM -volume dst_vol_name -max-autosize 120TB`

Error: command failed: Volume maximum autosize must be smaller than or equal to the maximum volume size of 100TB.

- 修改卷 `-is-large-size-enabled true` 会导致出现"不允许"错误
 - `netappl-dst:> volume modify -vserver dst_SVM -volume dst_vol_name -is-large-size-enabled true`
Error:command failed: Modification of the following fields: is-large-size-enabled not allowed for volumes of the type "Flexible volume - DP read-only volume".
