尝试增加卷最大自动大小功能时的注意事项

适用场景

- ONTAP 9
- SnapMirror
- 扇出
- 级联

问题描述

- 即使源卷和目标卷的版本相同、现有卷的大小也不能增加到100 TB以上
  - `netapp1-dst::> volume modify -vserver dst_SVM -volume dst_vol_name  -max-autosize 120TB`

```
      Error: command failed: Volume maximum autosize must be smaller than or
      equal to the maximum volume size of 100TB.
```

- 修改卷 `-is-large-size-enabled true` 会导致出现"不允许"错误

  - ```
    netapp1-dst::> volume modify -vserver dst_SVM -volume dst_vol_name -is-
    large-size-enabled true
    Error:command failed: Modification of the following fields: is-large-
    size-enabled not allowed for volumes of the type "Flexible volume - DP
    read-only volume".
    ```
